## LAKE SUPERIOR FARM BEGINNINGS

*...Please Join Us Sunday, August 2 from 1 to 4 pm...*

## SEASON EXTENSION WORKSHOP

*At Hermit Creek Farm in Highbridge WI*

Imagine selling farm produce in May, serving local tomatoes at Thanksgiving dinner, or eating fresh raspberries in the fall. Season extension turns these opportunities into reality by helping farmers develop a longer growing season. With season extension, there is a myriad array of choices, from floating row cover, high tunnels, low tunnels, heated greenhouses, to black plastic mulches and storage systems, as well as investment considerations and production education to attain before making decisions. Join Landis and Steven Spickerman at Hermit Creek Farm, where season extension is always at the forefront, to learn about appropriate technologies for your farm. This workshop is geared towards farmers but is open and will be interesting for the public as well. All are welcome to attend!

**Workshop is Free!**  
**Resources and Refreshments Available.**  
**For More Information, Contact:**  
**Cree Bradley, Faciliator**
