**Committee on Agriculture  
Special Session**

**TOTAL VALUE OF AGRICULTURAL PRODUCTION**

Note by the Secretariat<sup>1</sup>

Revision

1. At the 1 October 2009 meeting of the Committee on Agriculture Special Session, the Secretariat was requested to update the Secretariat document TN/AG/S/21/Rev.1 containing data on total value of agricultural production, in order to assist the ongoing agriculture negotiations.<sup>2</sup> In this context, on 6 October 2009 the Secretariat asked participants to provide annual data for those years that were not included in document TN/AG/S/21/Rev.1, from 1995 to the most recent year for which data were available.
2. The updates and revisions of the present paper are based on the data submitted by Members as response to the Secretariat request of 6 October 2009, as well as on Members' domestic support notifications to the Committee on Agriculture that were circulated by the Secretariat up to 1 October 2009.<sup>3</sup>
3. Table 1 shows the total values of agricultural production expressed in US dollars as a common currency. Table 2 shows the total values of agricultural production in the currency used by the Member concerned. Annex 1 contains a general note on exchange rates, and technical notes, including sources of data and any explanatory notes provided by Members.
4. It should be noted that in cases where the Member concerned provided the value of total agricultural production in domestic support notifications as well as in response to the Secretariat request, only the most recent data provided have been used in the following tables. In some cases, the submitted figures do not match the ones notified previously to the Committee.
5. In the following tables, a blank (" ") indicates that no information is available for the year in question.

---

<sup>1</sup> This document has been prepared under the Secretariat's own responsibility and is without prejudice to the positions of Members or to their rights or obligations under the WTO.

<sup>2</sup> Throughout this paper, the term "total value of agricultural production" referred to in paragraph 15 of the Agreed Framework is considered to be the same concept as "value of ... total agricultural production" referred to in Article 6.4(a)(ii) of the Uruguay Round Agreement on Agriculture.

<sup>3</sup> The data in domestic support notifications have generally been provided in connection with *de minimis* calculations regarding the non-product-specific AMS.

Notes: p provisional  
e estimation

- (i) Data in regular font refer to figures submitted in response to the Secretariat requests; data in italics refer to notified data.  
(ii) For the explanatory notes (a) to (c), see the technical notes pertaining to the Member concerned in Annex 1 to this paper.

## ANNEX 1

### General Note

#### Exchange rates

Where data were provided in domestic currency, they were converted into US dollars using the exchange rates from the IMF's "International Financial Statistics", except in the case of Chinese Taipei where the annual exchange rates were sourced from the Federal Reserve Bank of New York, FYR Macedonia where the annual exchange rate for 1995-1998 was sourced from the US Federal Reserve, and Ukraine where the annual exchange for 1995 was sourced from the National Bank of Ukraine.

The IMF exchange rates are period averages for the relevant calendar, financial or marketing year specified in the Schedule or submission of the Member concerned. For Australia, the exchange rates are averages for the period 1 July to 30 June. For the European Communities, the exchange rates are averages for the period 1 July to 30 June. For FYR Macedonia, the exchange rate of ECU/US\$ was used for 1995-1998. For Nepal, the exchange rates are averages for the period 1 July to 30 June. For New Zealand, the exchange rates are averages for the period 1 April to 31 March. For South Africa, average calendar year (e.g. the second period of the production year) exchange rates were used. In the case of Georgia, the average for the year 1995 is based on the period October-December 1995.

### Technical Notes

#### Argentina

Data submitted in US dollars. Gross Value of Agricultural Production (GVAP): only the sum of agricultural crops and livestock breeding was considered.

#### Australia

Data for Gross Value of Farm Production have been submitted for the years 1995/96 to 2007/08. Source: Australian Bureau of Agricultural and Resource Economics (ABARE).

#### Brazil

Data from the Ministry of Agriculture, Livestock and Food Supply of Brazil. For the years 1999 to 2004, data from the domestic support notifications were used.

#### Canada

For the years 2002-2004, data from the domestic support notifications have been used. As noted in Canada's 2005 Value of Production Data Submission to the WTO Secretariat, Canada resubmitted data for 1995 to 2001 to take into account its revised methodology for calculating value of production for most grains and oilseeds which was established in 2005.

Methodology for the years 1995-2004 is as follows: Value of production for most products is equal to total market receipts (source: Statistics Canada) plus price-related direct payments. For most grains and oilseeds, value of production is equal to production multiplied by price (source: Statistics Canada) plus price-related direct payments. Value of production is reported on a crop year basis for most grains and oilseeds and on a calendar year basis for all other products.

The submission of these data is without prejudice to any future data on the value of production that Canada might submit, including taking into account how value of production is estimated.

### Chile

Data pertain to Chile's agricultural gross domestic product (GDP). Agricultural GDP is the variable the Central Bank of Chile uses as an approximation of the total value of agricultural production. Source: Central Bank of Chile. For the years 2003-2007, data from the domestic support notifications have been used.

### China

China became WTO Member on 11 December 2001. The data for the years 1996 to 1998 provided during accession (WT/ACC/CHN/38/Rev.3 refers) are for reference only. Certain adjustment may have to be made due to the change of statistical methods. The domestic support notification (G/AG/N/CHN/8) concerning the years 1999-2001 was provided for transparency purposes.

### Colombia

Value of agricultural production for agriculture, livestock, hunting and forestry. Source: DANE, Annual National Accounts.

### Costa Rica

Gross value of production of main primary activities of the agricultural sector. Source: The Executive Secretariat of Agriculture Sector Planning (SEPSA). Product specific value of production was also provided for main products.

### Croatia

Source: Central Bureau of Statistics.

### Ecuador

Data on value of agricultural GDP (agriculture, hunting and forestry) was communicated in US dollars. Source: Central Bank of Ecuador.

### European Communities

Data from the domestic support notifications have been used (notified in ECU for the marketing years 1995/96 to 1998/99, and from the marketing year 1999/2000 notified in Euro). Source: Eurostat.

### Bulgaria

Data were notified in ECU until 1999, and from the year 2000 in Euro.

### Romania

Data submitted in Lei and US dollars. Source: Romanian Statistical Yearbook – National Institute for Statistics.

### Former Yugoslav Republic (FYR) of Macedonia

Data provided in Euros. Source: State Statistical Office.

### Georgia

Data from the Ministry of Agriculture of Georgia.

### Jordan

Data provided: Gross output at current prices. Source: Department of Statistics. For the years 2003 and 2004, data from the domestic support notifications have been used.

Republic of Korea

Data for 1995-2004 have been updated to include seaweed products that used to be categorized by Korea as NAMA products. Source: Food, Agriculture, Forestry and Fisheries Statistical Yearbook, and Fishery Production Statistical System.

**Table:** Value of Seaweed Production by the Republic of Korea, 1995-2004

Currency	1995	1996	1997	1998	1999	2000	2001	2002	2003	2004
KW bn	292.1	248.0	265.9	322.6	240.0	148.9	176.3	204.0	207.9	261.7
US\$ million	379	308	280	230	202	132	137	163	175	229

Source: Fishery Production Statistical System, Korea.

Mexico

Data for the years 1995 to 2004 submitted in Mexican peso and US dollars. Data were also broken down by product. Source: Agri-Food and Fishing Information Service.

Moldova

Data was broken down by vegetal origin, animal origin and services. Data from the Ministry of Economy of the Republic of Moldova.

Mongolia

Data for gross agricultural output (at current prices) also broken down by livestock and crops. Main agricultural products of Mongolia are meat (beef, mutton and goat, pork), milk, eggs, cereals, wheat, potato and other vegetables, wool, cashmere and hides and skins. Source: Ministry of Industry and Trade of Mongolia.

Nepal

Data for gross output (at current prices) includes both agriculture and forestry.

New Zealand

Data was obtained from New Zealand's system of national accounts and is based on March years. The data is total agricultural gross revenue less the value of agricultural services and non-farm income. This data is not inclusive of income in the agricultural processing sector. Data for 2004-2006 are estimates.

Oman

Two sets of data submitted: (a) agricultural production (e.g. agricultural sector domestic product, plus the sector's production requisites); and (b) gross domestic product of the agricultural sector. Source: Annual Statistical Book – Ministry of National Economy.

Pakistan

Data submitted in US dollars for the years 1995 to 2006.

Paraguay

Total Value of Agricultural Production (Estimate). The basic and official economic statistics of the Republic of Paraguay, prepared and published by the Central Bank of Paraguay (BCP), contain no total value of agricultural production that meets the definition of agricultural products in the WTO Agreement on Agriculture (Annex 1). The values provided are therefore an approximation worked out using official data from the national accounts.

In addition to this problem, it should be noted that economic statistics in general have considerable limitations. Currently, Paraguay draws up its national accounts using the conceptual and methodological framework of the 1953 version (Revision: 2) of the United Nations System of National Accounts. The base year or reference period is 1982, which is *per se* outdated and has little capacity to represent current characteristics of the economy, failing to reflect adequately changes in the characteristics of agricultural production. In this connection, with the cooperation of the IADB, the BCP is developing a medium-term programme geared to implementing national accounts with updated methodological procedures and a new base year (1994), which is closer to the current circumstances of the Paraguayan economy.

Source: Drawn up by MAG-CECII using data of the Central Bank of Paraguay (BCP), Directorate of Economic Studies (*Gerencia de Estudios Económicos*), National Accounts and Domestic Market Department, Asuncion, November 2004.

#### Philippines

The figures for the value of production of key agricultural products at current prices were also provided. Sources: Selected Statistics on Agriculture 2000, BAS; Selected Statistics on Agriculture 2001, BAS; Selected Statistics on Agriculture 2002, BAS; Selected Statistics on Agriculture 2004, BAS; Selected Statistics on Agriculture 2005, BAS.

#### South Africa

Data for Gross Value of Agricultural Production provided for the period 1994/95 to 2006/07, based on production years. Data for the year 2006/07 – R 91,384,553,000 and for the year 2007/08 – R 119,839,842,000 - are preliminary. Source: Abstract of Agricultural Statistics, Department of Agriculture.

#### Switzerland

Source: Swiss Federal Statistical Office. Values at current basic prices. Values are part of Economic Accounts for Agriculture (EEA). These do not include small producers, nor horticultural services (landscape architecture).

#### Chinese Taipei

Data provided for the years 1995 to 2006. Total Agricultural Production is the sum of Agricultural Production (as reported in *Agricultural Statistics Yearbook*) and Forage Production. The *Agricultural Statistics Yearbook* of the Separate Customs Territory of Taiwan, Penghu, Kinmen and Matsu features the official statistics for Agriculture which covers crops, animals, forestry and fisheries sectors. The agricultural production values as contained in this paper only include crops and animals production consistent with the WTO definition. Up to the year 2006, forage production was not included in the statistics for crops production.

#### Thailand

Source: Office of Agricultural Economics, Ministry of Agriculture and Cooperatives.

#### Trinidad and Tobago

Data for the total value of agricultural production also broken down by type of activity such as export agriculture, domestic agriculture and sugar industry. Data for 2004 are provisional. Source: National Income (C.S.O.). Prepared by: Agricultural Data and Information Unit, Ministry of Agriculture, Land and Marine Resources.

#### Turkey

Data for agricultural GDP submitted in US dollars (including the average exchange rates). The figures for the value of production of some agricultural products were also provided.

Ukraine

Data for 1995 (c) are in the provisional currency, Karbovanets (Krb). The exchange rate to convert Krb into US\$ was sourced from the National Bank of Ukraine (1US\$=147463 Krb). In August 1996, a new official currency - the Hryvnia (UAH) - was introduced at par with the provisional currency 1 UAH = 100,000 Krb.

United States

Data have been updated to take into account both revised technical data and corrections as well as a missing category. Specifically, ducks and other poultry had not been included in the previous data. Source: primarily National Agricultural Statistics Service (NASS) as per footnotes in US notifications. Cash receipts reported by the Economic Research Service were used for fruits and nuts, vegetables, horses and mules, other livestock, and "other crops", excluding cash receipts for some specific crops that are available as actual value of production in NASS reports.

Uruguay

Value of production data have also been notified for most of the years in Uruguayan peso. Source: Central Bank of Uruguay.
