Community Forestry Resource Center

A project of the Institute for Agriculture and Trade Policy

Weekly News and Event Summary

February 2, 2010

Dear Readers.

Sorry for the slight delay in sending out this issue of the CFRC listserv. The next edition will be published on February 11.

This message includes news, headlines and information gathered during the week.

News

Survey Shows Minnesotans Value Well Managed Forests

DOVETAIL PARTNERS, INC.

Polling results support public benefits of wildlife, clean air and water http://www.forestrycenter.org/index.cfm?RefID=107162

Global Warming: 'Cooling' Forests Can Heat Too

SCIENCEDAILY

The simple formula we've learned in recent years -- forests remove the greenhouse gas CO2 from the atmosphere; therefore forests prevent global warming -- may not be quite as simple as we thought. Forests can directly absorb and retain heat, and, in at least one type of forest, these effects may be strong enough to cancel out a good part of the benefit in lowered CO2. http://www.forestrycenter.org/index.cfm?RefID=107161

OSU study revises forest fire carbon estimate

THE REGISTER-GUARD | FEB. 2, 2010

Pacific Northwest forest fires may play a minor role in climate change compared with fossil fuel use, according to a new analysis by Oregon State University researchers. http://www.forestrycenter.org/index.cfm?RefID=107164

Oregon wildfires released far less greenhouse gas than previously estimated, researchers say

THE OREGONIAN | FEB. 2, 2010

Some of the worst forest fires in Oregon's recent history consumed far fewer trees and released far less carbon dioxide than previously estimated, a new study by Oregon State University researchers concludes. http://www.forestrycenter.org/index.cfm?RefID=107165

Chemicals in forest fire smoke studied

UPI.COM

South African scientists say chemicals in smoke from forest fires may regulate seed germination and play a key role in the rebirth of burned landscape.

Events

Green Building & Green Product Webinar

FEBRUARY 11, 2010, ONLINE WEBINAR

Event Examines Fundamentals of Chain-of-Custody Certification A series of webinars offered by the Forest Products Management Development Institute (FPMDI), Department of Bioproducts and Biosystems Engineering, and Dovetail Partners will address key aspects of green marketing and related trends.

For more information, contact Tom Schirber at 612-624-2767 or <a href="mailto:schirber-schirb

Wisconsin Wetlands Association 15th Annual Wetland Science Conference

FEBRUARY 11-12, 2010, EAU CLAIRE, WI

The conference will convene members of the regional wetland community to discuss the latest in wetland science, management and protection issues as they relate to the ecological services wetlands provide.

For more information contact the Wisconsin Wetlands Association at 608-250-9971 or info@wisconsinwetlands.org, or visit info@wisconsinwetlands.org, or visit

Seminar: Getting Help With Land Management

FEBRUARY 20, 2010, SENECA, WI

A program on Saturday, February 20, 10:00 am at the County Highway shop south of Seneca, will familiarize landowners with the programs and organizations available to help them accomplish their objectives for natural areas on their properties.

For more information, contact Lila Marmel at 608-624-5269 or sunmoon@mwt.net, or visit http://www.forestrycenter.org/events.cfm?refID=107167&categoryID=.

Introduction to Prescribed Fire

MARCH 25-26, 2010, BARABOO, WI

This two-day course will cover the ecology of fire, fire behavior principles, and the elements of fire management planning, all particularly focused on prairie and savanna ecosystems. Participants will operate basic fire management tools, view the layout and preparation of a fire unit, and, weather permitting, conduct several real burns.

For more information, contact Alanna Koshollek at 608-355-0279 ext. 30 or alanna@aldoleopold.org, or visit http://www.forestrycenter.org/events.cfm?refID=107169&categoryID=.

Birding the Important Bird Area

MAY 8, 2010, BARABOO, WI

Come experience the ornithological diversity of the Leopold–Pine Island Important Bird Area! Learn to identify birds by sound, and develop your understanding of bird/habitat relationships. We'll start with a short outdoor listening session early in the morning, then head to the classroom to learn bird identification by sight and sound, connect birds to specific habitat types, and discuss conservation and management for the habitats and/or the birds.

For more information, contact The Woodland School Alanna Koshollek at (608) 355-0279, x.30 or alanna@aldoleopold.org, or visit

http://www.forestrycenter.org/events.cfm?refID=107170&categoryID=

Information

Summer Internships with the Madison Audubon Society

From the Faville Grove Sanctuary Web site: "As an intern in this supervised practical experience, you will spend the summer in the field where you will learn by doing a number of tasks in broad-scale landscape restoration and management, including work in prairie, savanna, woodland, and wetland habitats. The primary focus of activities is the control of invasive species, but some time will be spent on seed collecting and endangered species monitoring. The internship will give you the opportunity to become familiar with both native and alien plants and to learn about their life cycles and ecological requirements; to observe what natural conditions and processes have been altered in a landscape; and to gain an understanding of restoration and management goals and objectives. Interns work in small groups at sites within 30 miles of Madison. Two teams will be hired for the summer of 2010: one to work at Madison Audubon's Faville Grove Sanctuary east of Madison, and one to work at several sites north and west of Madison. Applicants will be considered for both teams unless otherwise requested."

Publications

Nontimber Forest Products Curriculum Workbook Now Available

The Institute for Culture and Ecology (IFCAE) has conducted several regional and national studies documenting the important role of nontimber forest products in the United States. Universities and extension programs are increasingly looking for ways to include information about NTFPs in curricula. To address this demand IFCAE developed the 451 page Nontimber Forest Product Curriculum Workbook containing over 100 lesson plans, handouts, and homework assignments. Also included are PowerPoint files that can be used as is or modified by the instructor as needed. Review the materials at http://www.ifcae.org/projects/ncssf2/index.html.

New CFRC Newsletter Available Now!

The new edition of the Community Forestry Connections newsletter is now available on the forestrycenter.org Web site as a PDF file for download. In the fall 2009 issue you can get recent updates on the work that the Community Forestry Resource Center has been supporting, including: a habitat restoration and bioenergy program, a bird-friendly forestry project, Emerald Ash Borer in Minnesota and Wisconsin, the Wisconsin BMP's for invasive species and an update

<u>Support IATP and Make a Difference in the World Today!</u> IATP works hard to keep farmers on their land, to ensure the safety of our food supply and to preserve biodiversity and the environment for future generations. We cannot do this work without you. Please join us in our work of advocating for fair and sustainable food, farm and trade systems. Your support is greatly appreciated!

<u>Please support our work today!</u> If you have additional questions about supporting IATP, please contact Kate Hoff at 612-870-3404 or <u>khoff@iatp.org</u>. Thank you!
